Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-4, 8-19, 22-25, 30-34 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-28 of U.S. Patent No. 6,575,220 in view of Schnitzer et al. (U.S. 6,547,914). U.S. Patent 6,575,220 claims all of the instantly claimed limitation except for the transfer marks to be composed of a mark and an overwriting blank space. Schnitzer et al. teaches that labels can have overwriting blank spaces so article specific information can be stamped or written thereon (column 1, lines 32-40). It would have been obvious to one of ordinary skill in the art at the time the invention was made to add a blank overwriting space into the labels of the 6,575,220 patent claims because Schnitzer et al. teaches that this gives added flexibility in using such labels.

3. Claims 5-7 and 26-29 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-28 of U.S. Patent No. 6,575,220 in view of Schnitzer et al. (U.S. 6,547,914) and MacIntyre (U.S. 4,880,490). As shown in paragraph 2 above, U.S. Patent 6,575,220 and Schnitzer et al. show all of the claimed features except two cut lines. MacIntyre shows two cut lines are provided between the transfer marks and the interval of the cut lines is larger than the pressing width of the transfer head. It would have been obvious to one of ordinary skill in the art at the time the invention was made to add cut lines between the labels in order to keep the leading edge of the new label securely on the backing web until application, thereby keeping the adhesive clean.

4. Applicant is advised that should claim 3 be found allowable, claim 4 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

5. Applicant is advised that should claim 10 be found allowable, claim 13 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing

Art Unit: 1734

one claim to object to the other as being a substantial duplicate of the allowed claim.

See MPEP § 706.03(k).

6. Applicant is advised that should claim 32 be found allowable, claim 33 will be objected to under 33 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim.

See MPEP § 706.03(k).

Claim Objections

7. Claims 20-21 and 35-43 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple depended claim. See MPEP § 608.01(n). Accordingly, the claims 20 and 21 have not been further treated on the merits.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Doll et al. shows a label with preprinted areas and blank areas for writing thereon.
